

varieties, competence & service

Georgina

high yielding, medium early quality ware potato

- stable high yield
- uniform grading, big tuber size
- nice tuber shape
- very nice, smooth skin
- nice, uniform tubers with shallow eyes

Variety characteristics			
Maturity	medium early	Tuber	Tuber shape Eye depth Skin Flesh colour
Cooking Type (EAPR)	B		
Consumption quality	quality ware potato; good table quality		
Yield	high marketable yield; uniform big tuber size	Resistances	PCN Virus diseases Leaf blight Common scab
Youth development	rapid		
Dormancy	high; good storability	Sensitivities	Spraing Bruising Mechanical damage
			low very low low - medium
Growing recommendations			
Site requirements	medium demands to soil quality and water supply. Soils with high pressure of common scab and second growth should be avoided		
Planting	planting density	approx. 39.000 plants/ha (seed size 35/55 mm) => check QR Code for more details	
	planting depth	normal compared with local standard	
	seed preparation	sprouting stimulation generally advantageous	
	seed treatment	preventive control of <i>Rhizoctonia solani</i> is generally recommended	
Herbicides	no sensitivities known		
Fertilization			further information
Nitrogen	low-medium - compared with local standard		
Phosphorus	100 kg/ha		
Potassium	200 - 250 kg/ha (medium soil supply class)		
Magnesium	60 kg/ha		

All particulars are based on official variety trials and/or our own experience.
However, as potatoes are natural products we cannot undertake any liability for these details.
